

Home

Were you expecting to find a different page?

Our documentation pages have moved from cnfl.extge.co.uk to research-help.genomicsengland.co.uk, and all public help pages previously found at cnfl.extge.co.uk/display/OC will now redirect here.

Please go to the [Research Environment User Guide](#) or use the site map below to find the page you were looking for and update your bookmarks. Sorry for the inconvenience.

Welcome to the training materials and resources for the Genomics England Clinical Interpretation Partnership (GeCIP), the community set up to analyse the 100,000 Genomes Project data.

Within these pages you'll find full details for what is available within the environment, and how to make the most out of the data and resources that have been made available to you.

If you're unable to find the answer to your questions here, or find there is inaccurate information then please [don't hesitate to email us at gecip-help@genomicsengland.co.uk](mailto:help@genomicsengland.co.uk).

To find out how to access the data for research, go to [GeCIP and your access to data](#).

This site is divided into:

- [GeCIP](#) - containing information on the GeCIP model and how to get approval for, and register, research projects;
- [The Research Environment](#) - containing guides on working within the Research Environment, and information on the tools and data we provide;
- [Project Documentation](#) - a repository of important documents relating to both 100,000 Genomes Project and GeCIP.
